

# A SUSTAINABLE FUTURE BEGINS WITH BIO4PACK

June 2017

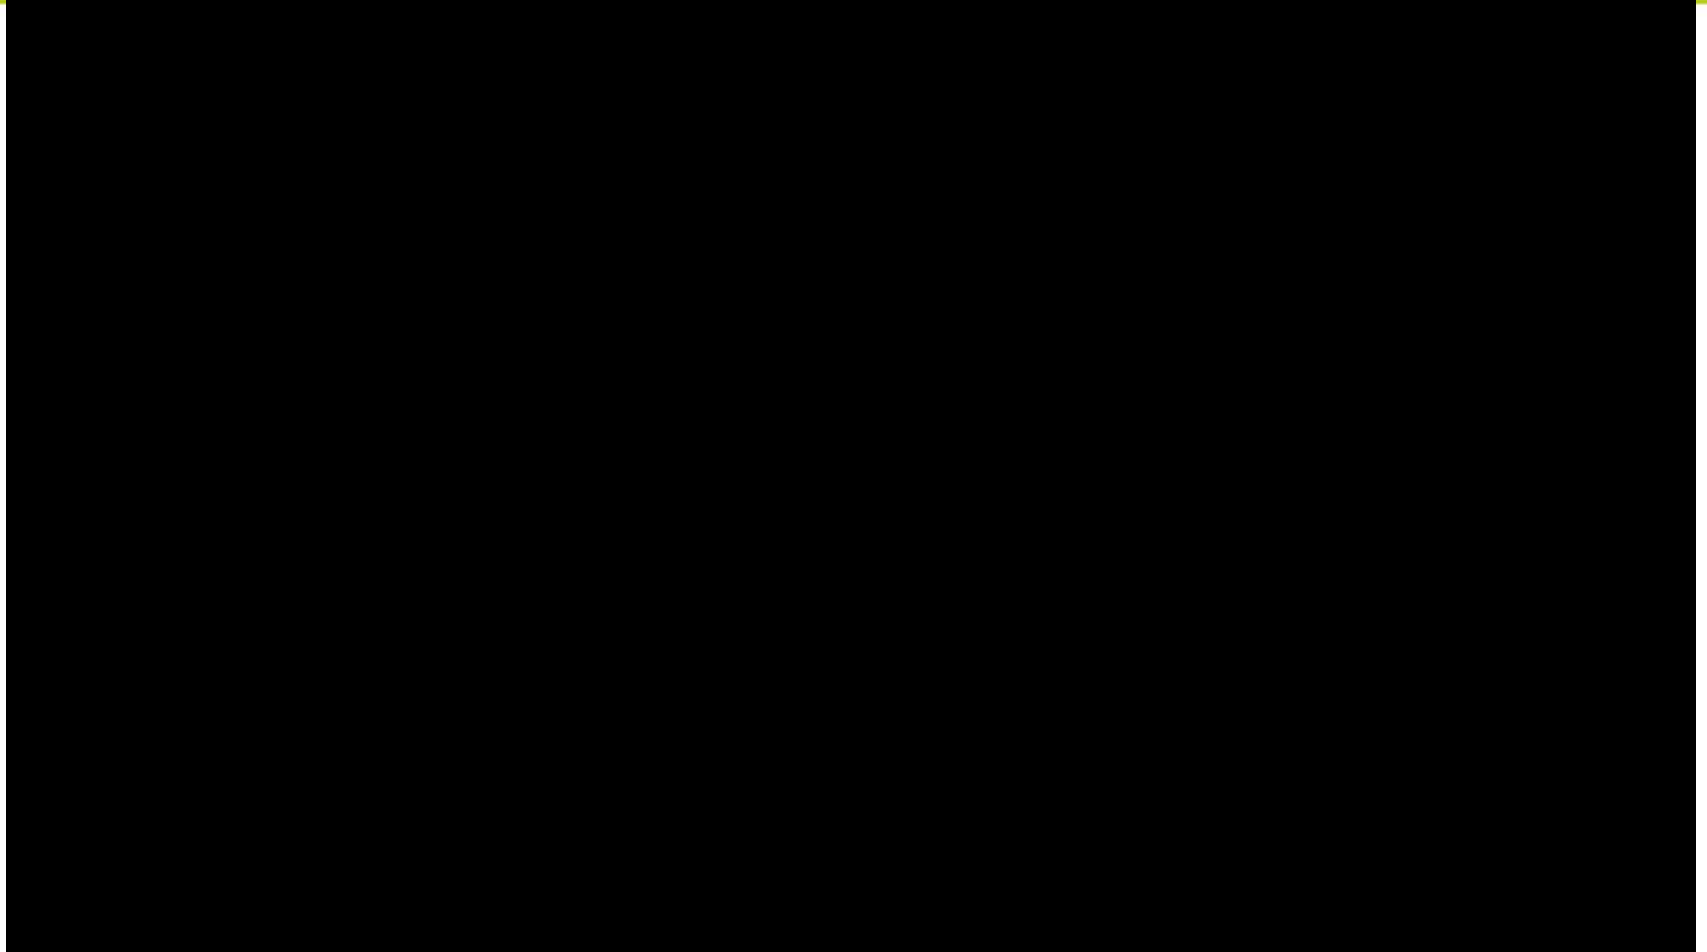

Patrick Gerritsen

## BIO4PACK

SUSTAINABLE PACKAGING

# Food for thought

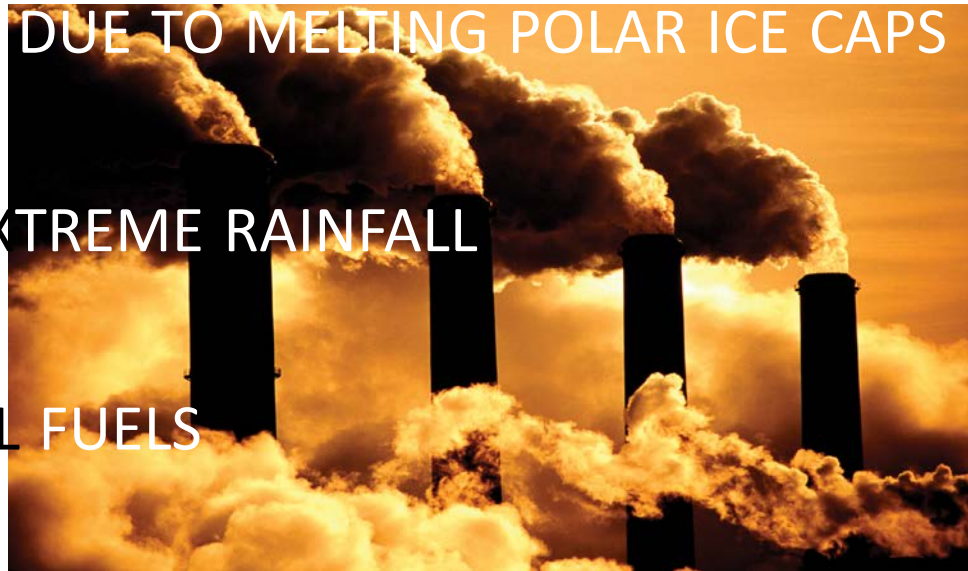

# Do you think this is normal?

15° CELSIUS ON CHRISTMAS EVE IN WEST EUROPE

RISING OF SEA LEVEL DUE TO MELTING POLAR ICE CAPS

FLOODING DUE TO EXTREME RAINFALL

DEPLETION OF FOSSIL FUELS

Do you think this is normal?

DO WE TAKE THIS  
FOR GRANTED?

Do you think this is normal?

OR

Do you think this is normal?

ARE WE WAKING UP?

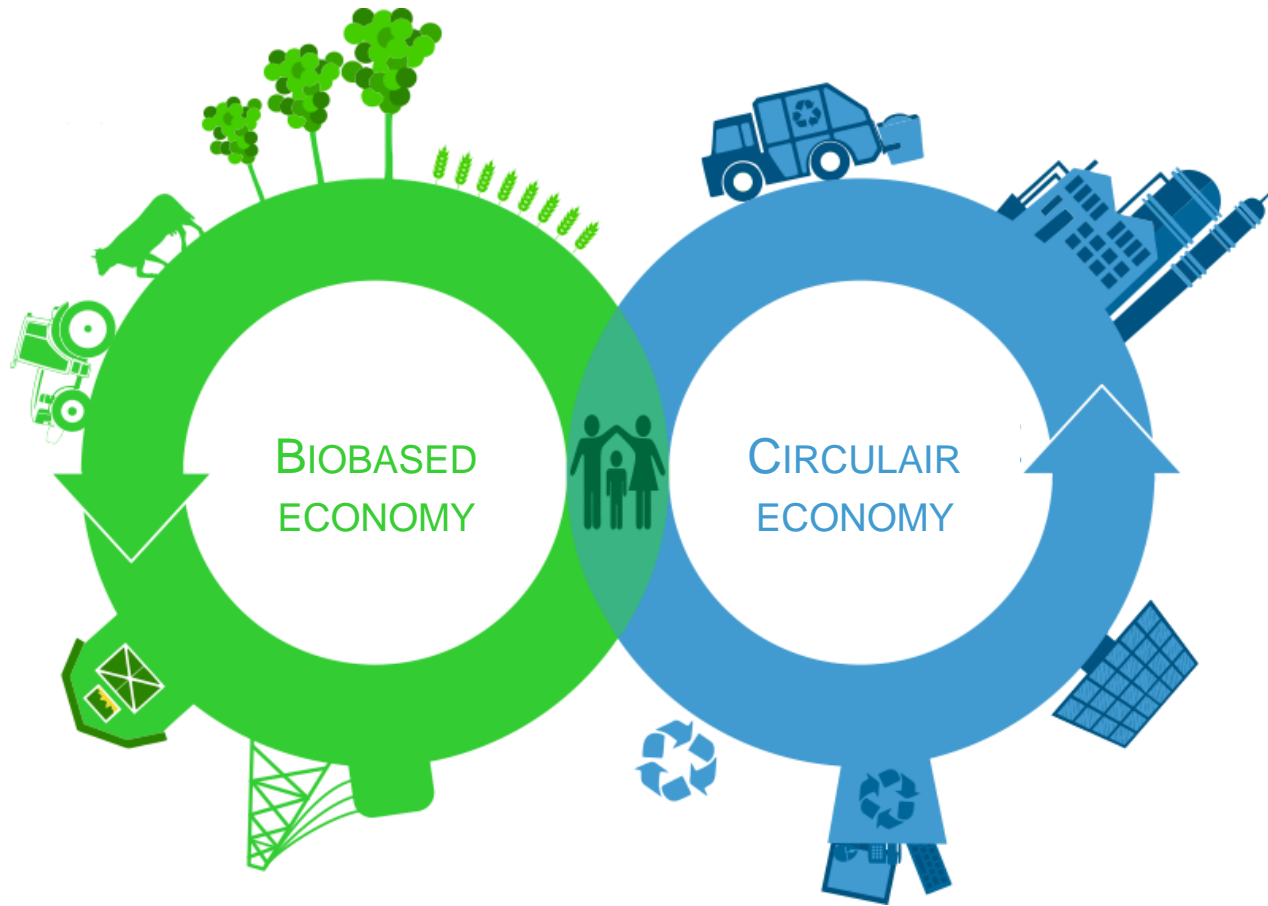

(JUST IN TIME...)

It's not about money, it's about our future!

It's time to save the earth!

# Let's accelerate new economies

# Let's accelerate new economies

Bio4Pack wants to contribute to new economies and a sustainable world.

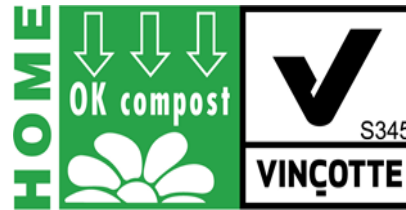

*Bio4Pack's mission is to provide excellent, innovative products in order to meet the demand for sustainable and fully compostable packaging.*

Bio4Pack is committed to the conservation of our global environment and the elimination of unnecessary pollution caused by packaging.

# Let's accelerate new economies

Bio4Pack wants to contribute to new economies with the right certifications:

Either;  
compostable:

Biobased ASTM 6866:

Biobased 16785:

# This is what we stand for

We want to make a contribution to saving the world with packaging that has as less impact on our environment as possible.

- Helping companies switch to compostable and sustainable packaging solutions
- Packaging made out of renewable resources
- Packaging that's compostable after use
- Developing environment friendly packaging with the same quality and characteristics as traditional packaging

# Our contribution

# Changing to sustainable packaging the Bio4pack way

## 7 steps to successful implementation

1. Analysis of the type of packaging (the product to be packed is always leading)
2. Development of packaging for specific product
3. Testing packaging
4. Request for certificate
5. Production of the packaging
6. Implementation in production proces
7. Communication with various internal and external audiences

Bio4Pack is closely involved in all steps in the process.

# Changing to sustainable packaging

Another famous astronaut  
once said:

It's a small step  
for men,  
But a giant leap  
for menkind

# Changing to sustainable packaging

*At Bio4Pack we say:*

Changing to sustainable packaging  
is a small step  
Together we make it  
a (necessary) giant leap for the future
